

Supercoat's DecoEffects Metallic Effects Systems offers a unique array of metallic colors for blending in epoxy to create a wide range of effects from spatter, waves, scatters, marbling, rain drops, and granite among others. The Metallic Effects are used with DecoEffects 100 clear epoxy. Background colors for the metallic coat can be achieved with addition of liquid color packs into the DecoEffects Metallic Effects with 550 Urethane Glaze for an exquisite finish.
