FLOORINGS & LININGS A DIVISION OF MILAMAR COATINGS, L.L.C.

Material Safety Data Sheet

| Revision Date: | 08/12 | Print Date: | 08/21/12 | |
|----------------|-------|----------------------|-----------------------------|---------------------|
| Version 2.0 | | MSDS Identification: | 3100CR - Veil Coat - Part A | Novolac Epoxy Resin |

1. PRODUCT AND COMPANY IDENTIFICATION

| Product Name | : | 3100CR - Veil Coat - Part A |
|----------------------------|----|------------------------------------------------------------------------------------------------------------------------------------|
| Product Use Description | : | Novolac Epoxy Resin |
| Company | : | Protective Floorings and Linings A Division of Milamar Coatings, LLC 311 N.W. 122nd St, Suite 100 Oklahoma City, OK 73114 |
| Telephone | : | 405-755-8448 |
| Emergency Telephone Number | r: | ChemTel 800-255-3924 or 813-248-0585 (International) |

2. COMPOSITION / INFORMATION ON INGREDIENTS

| Components | CAS Number | Concentration (Weight) |
|----------------------------|------------|------------------------|
| Epoxy Phenol Novolac Resin | 28064-14-4 | 100% |

3. HAZARDS INFORMATION

| Emergency Ov | verview Yellow liquid. Aromatic odor. May cause allergic skin reaction May cause eye irritation. | on. | |
|-----------------|--------------------------------------------------------------------------------------------------------------|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Potential Healt | h Effects | | |
| | Еуе | : | May cause slight eye irritation. Corneal injury is unlikely. |
| | Skin | : | Prolonged or repeated exposure may cause moderate skin irritation. May cause more severe response if skin is abraded (scratched or cut). Has caused allergic skin reactions when tested in guinea pigs. Prolonged skin contact is unlikely to result in absorption of harmful amounts. |
| | Ingestion | : | Low toxicity if swallowed. Small amounts swallowed incidental to normal handling operations are not likely to cause injury; however, swallowing larger amounts may cause injury. |
| | Inhalation | : | At room temperature, exposure to vapor is minimal due to low volatility; vapor from heated material may cause respiratory irritation. |
| | Systemic Effects | : | No relevant information found. |

| | Revision Date: Version 2.0 | 08/12 | Print Date MSDS Identification | | Novolac Epoxy Resin |
|--------------|-------------------------------|------------------|-----------------------------------|-----------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | Cancer Informa | tion : | No relevant information found. | |
| | | Teratology (Birl | h Defects) : | No relevant information found. | |
| | | Reproductive E | ffects : | No relevant information found. | |
| 4. FIRST AID |) MEASURES | 5 | | | |
| | Eyes | | : | , , , | r for several minutes. Remove contact lenses after lushing for several additional minutes. If effects occur, n ophthalmologist. |
| | Skin Contact | | : | | Items which cannot be decontaminated, including elts, and watch bands should be disposed of properly. |
| | Ingestion | | : | If swallowed, seek medical atten by medical personnel. | tion. Do not induce vomiting unless directed to do so |
| | Inhalation | | : | Move person to fresh air; if effect | ts occur, consult a physician. |
| | NOTES TO PH | YSICIAN | : | warm water for at least 15 minute | n wash with mild non-abrasive soap and plenty of es. No specific antidote. Treatment of exposure of symptoms and the clinical condition of the patient. |

5. FIRE-FIGHTING MEASURES

Flammable Properties

| Flash Point Method Used Auto Ignition Temperature Flammability Limits | : : : | 495 degrees F PMCC Not applicable |
|--------------------------------------------------------------------------------|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| LFL UFL | : | Not applicable Not applicable |
| Hazardous Combustion Products | : | During a fire, smoke may contain the original material in addition to combustion products of varying composition which may be toxic and / or irritating. Combustion products may include and are not limited to : phenolic compounds, carbon monoxide, and carbon dioxide. |
| Other Flammability Information | : | Container may rupture from gas generation in a fire situation. Violent steam generation or eruption may occur upon application of direct water stream to hol liquids. Dense smoke is emitted when burned without sufficient oxygen. |
| Extinguishing Media | : | Water fog or fine spray, dry chemical fire extinguishers, carbon dioxide fire extinguishers and foam. Do not use direct water steam. May spread fire. Alcohol resistant foams (ATC type) are preferred. General purpose synthetic foams (including AFFF) or protein foams may function, but will be less effective. Water fog, |

| Material Salety Data Sheet | | |
|------------------------------------------|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Revision Date: 08/12 Version 2.0 MSDS | Print Date: Identification: | |
| | | applied gently may be used as a blanket for fire extinguishment. |
| Fire Fighting Instructions | : | Keep people away. Isolate fire area and deny unnecessary entry. Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of re-ignition has passed. Fight fire from protected location or safe distances. Consider use of unmanned hose holder or monitor nozzles. Immediately withdraw all personnel from area in case of rising sound from venting safety device or discoloration of the container. Do not use direct water stream. May spread fire. Move container from fire area if this is possible without hazard. Burning liquids may be moved by flushing with water to protect personnel and minimize property damage. Water fog, appliec gently, may be used as a blanket for fire extinguishment. |
| Protective Equipment For Fire Fighters | : | Wear positive pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, pants, boots, and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance. |
| 6. ACCIDENTAL RELEASE MEASURES | : | (See Section 15 For Regulatory Information). |
| Protect People | : | Isolate area. Keep unnecessary and unprotected personnel from entering the area Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls / Personal Protection. Refer to Section 7, Handling, for additional precautionary measures. |
| Protect The Environment | : | Prevent from entering the soil, ditches, sewers, waterways and / or groundwater. See Section 12, Ecological Information. |
| Cleanup | : | Absorb with material such as sand. Collect in suitable and properly labeled containers. Remove residual with soap and hot water. Solvents are not recommended for clean up unless the recommended exposure guidelines and safe handling practices for the specific solvent are followed. Consult appropriate solvent MSDS for handling information and exposure guidelines |
| 7. HANDLING AND STORAGE | | |
| Handling | : | Avoid contact with eyes, skin and clothing. Wash thoroughly after handling. See Section 8, Exposure Controls / Personal Protection. |
| Storage | : | No specific requirements. Additional storage information o this product may be obtained by calling your PF&L sales or customer service contact. |

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

| Engineering Measures | : | Good general ventilation should be sufficient for most conditions. Local exhaust ventilation may be necessary for some operations. |
|----------------------|---|------------------------------------------------------------------------------------------------------------------------------------|
| Eye Protection | : | Use safety glasses. |
| Skin Protection | : | Remove contaminated clothing immediately, wash skin area with soap and water, and |

10. STABILITY AND REACTIVITY

| | Revision Date: Version 2.0 | 08/12 | Print Date: MSDS Identification: | | Novolac Epoxy Resin |
|------------|-------------------------------|-----------|-------------------------------------|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | | | decontaminated, such as shoes, | dispose of properly. Items which cannot be belts and watchbands, should be removed and re cut or scratched, use gloves chemically resistant to ures. |
| | Respiratory Protection | on | : | | ry protection should be needed; however, if handling sufficient ventilation, use an approved air-purifying |
| | Exposure Limit(s) | | : | None established | |
| 9. PHYSICA | L AND CHEMICA | L PROPE | RTIES | | |
| | Appearance / Physic | cal State | : | Yellow Liquid | |
| | Odor | | : | Aromatic | |
| | Vapor Pressure | | : | Extremely low, not determined | |
| | Vapor Density | | : | Not determined | |

Decomposes

1.19

< 0.1 at 20 degrees C.

May Solidify < -15 degrees C.

1

:

1

:

| Chemical Stability | : | Thermally stable at typical use temperatures. |
|------------------------------|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Conditions To Avoid | : | Avoid temperatures above 350 degrees C, 662 degrees F. Potentially violent decomposition can occur above 350 degrees C, 662 degrees F. Generation of gas during decomposition can cause pressure in closed systems. Pressure build-up can be rapid. |
| Incompatibility With Other M | laterials : | Avoid contact with oxidizing materials, acids, bases. Avoid unintended contact with amines. |
| Hazardous Decomposition I | Products : | Decomposition products depend upon temperature, air supply and the presence of other materials. Gases are released during decomposition. Uncontrolled exothermic reaction of epoxy resins release phenolics, carbon monoxide and water. |
| 11. TOXICOLOGICAL INFORMATIC | N : | |
| Skin | : | The dermal LD50 has not been determined. |

| Revision Date: 08/12 MSDB identification: 300CR - Veil Coat - Pert A Neucleac Epoxy Resm Ingestion :: The oral LD 50 for rais is > 2000 mg/kg. Mutagenicity: :: No relevant information found. 12.
