FLOORINGS & LININGS A DIVISION OF MILAMAR COATINGS, L.L.C. Material Safety Data Sheet

Revision Date:	05/12	Print Date:	08/30/12	
Version 2.0		MSDS Identification:	6100FS - Part A	Unsaturated Polyester Resin

1. PRODUCT AND COMPANY IDENTIFICATION

Product Name :	6100FS - Part A
Product Use Description :	Unsaturated Polyester Resin
Company :	Protective Floorings and Linings A Division of Milamar Coatings, LLC 311 N.W. 122nd St, Suite 100 Oklahoma City, OK 73114
Telephone :	405-755-8448
Emergency Telephone Number:	ChemTel 800-255-3924 or 813-248-0585 (International)

2. COMPOSITION / INFORMATION ON INGREDIENTS

Components	CAS Number	Concentration (Weight)
Unsaturated Polyester Base Resin	See Index	40%-70%
Styrene Monomer	000100-42-5	30%-60%

3. HAZARDS INFORMATION

Flamma Vapors Harmfu May Ca May Ca May Be May Ca Highly Isolate Keep U	t Styrene Odor. Ible Liquid And Vapor. May Travel A Long Distance Or Fatal If Swallowed. use Eye Irritation. use Skin Irritation. Harmful If Inhaled. use Anesthetic Effects. Toxic To Fish And / Or Other	; Ignition And / Or Flash Back May Occur. Aquatic Organisms.
Potential Health Effects Eye	(See Section 11 for toxicoloc :	gical data.) May cause moderate eye irritation. May cause slight corneal injury. Vapor may cause eye irritation experienced as mild discomfort and redness. Vapor may cause lacrimation (tears).
Skin	:	Prolonged contact may cause slight skin irritation with local redness. Material may stick to skin causing irritation upon removal. Prolonged skin contact is unlikely to result in absorption of harmful amounts. Repeated contact may cause skin burns.

Revision Date: Version 2.0		Print Date: Identification:		Unsaturated Polyester Resin	
			Symptoms may include pai	n, severe local redness, swelling, and tissue damage.	
	Ingestion	:		Aspiration into the lungs may occur during ingestion or absorption and injury to other body systems.	
	Inhalation	:	Symptoms of excessive ex	ttainable which could be hazardous on single exposure. posure may be anesthetic or narcotic effects; dizziness served. Excessive exposure may cause irritation to e and throat).	
	Systemic Effects	÷	following organs: central ne effects have been observed is reported to have caused concentrations (>800 ppm) Some studies in humans al	animals has been reported to cause effects on the ervous system, kidney, liver and respiratory tract. Lung d in mice following repeated exposure to styrene. Styrene hearing loss in laboratory animals upon exposure to high ; however, the relevance of this to humans is unknown. lege that repeated exposure to styrene may result in minor, e ability to discriminate between colors.	
	Cancer Information	:	hazard communication pur Components listed by IARC observed in mice from a re finding to humans is uncert	ponent(s) which are listed as potential carcinogens for posed under OSHA Standard 29 CFR Part 1910.1200. C: Styrene. An increased incidence of lung tumors are cent inhalation study on styrene. The relevance of this ain since data from other long-term animal studies and from rkers exposed to styrene do not provide a basis to rcinogenic.	
	Teratology (Birth Defec	ts) :		ne did not produce birth defects, but was toxic to the fetus having an adverse effect on the mother.	
	Reproductive Effects	:	Contains conponent(s) whi The component(s) is / are s	ch did not interfere with reproduction in animal studies. styrene.	
4. FIRST AID MEASURES					
Eye Contact		:	initial 1-2 minutes and cont	water for several minutes. Remove contact lenses after inue flushing for several additional minutes. If effects preferably an ophthalmologist.	
Skin Contact		:	Wash skin with plenty of wa	ater.	
Ingestion		:	Do not induce vomiting. Ca immediately.	all a physician and / or transport to emergency facility	
Inhalation		:		eathing, give artificial respiration. If breathing is difficult, ered by qualified personnel. Call a physician or transport	
Note To Physici	an	:	systemic effects, the decisi a physician. If lavage is per Danger from lung aspiration	nay occur through the lungs if aspirated and cause on of whether to induce vomiting or not should be made by rformed, suggest endotracheal an / or esophageal control. n must be weighted against toxicity when considering intain adequate ventilation and oxygenations of the patient.	

Revision Da Version 2.0		int Date: tification:	
			Consider additional thorough skin wash with mild non-abrasive soap and plenty of warm water for at least 15 minutes. If burn is present, treat as a thermal burn, after decontamination. No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.
5. FIRE-FIGHTING MEA	ASURES		
Flammable F	Properties Flash Point Method Used Auto Ignition Temperature	:	74-84F ASTM-D93, PMCC 914F (490C) based on styrene
Flammability	Limits LFL UFL	:	0.9% (based on styrene) 6.8% (bases on styrene)
Hazardous C	Combustion Products	:	During a fire, smoke may contain the original material in addition to combustion products of varying composition which may be toxic and / or irritating. Combustion products may include and are not limited to phenolic compounds, carbon monoxide, carbon dioxide.
Other Flamm	nability Information	:	Container may rupture from polymerization. Violent steam generation or eruptior may occur upon application of direct water steam to hot liquids. Electrically bond and ground all equipment. Flammable mixtures of this product are readily ignited, even by static discharge. Vapors are heavier than air and by travel a long distance and accumulate in low lying areas. Ignition and / or flash back may occur. Flammable mixtures may exist within the vapor space of containers at room temperature. Flammable concentrations of vapor can accumulate at temperatures above flash point. Dense smoke is emitted when burned without sufficient oxygen.
Extinguishing	g Media	:	Water fog or fine spray, carbon dioxide fire extinguishers, dry chemical fire extinguishers, foam. Do not use direct water stream. Straight or direct water streams may not be effective to extinguish fire. General purpose synthetic foams (including AFFF type) or protein foams are preferred if available. Alcohol resistant foams (ATC type) may function. Water fog, applied gently may be used as a blanket for fire extinguishment.
Media To Be	Avoided	:	Do not use direct water stream.
Fire Fighting	Instructions	:	Keep people away. Isolate fire area and deny unnecessary entry. Stay upwind. Keep out of low areas where gases (fumes) can accumulate. Water may not be effective in extinguishing fire. Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of re-ignition has passed. Fight fire from protected location or safe distance. Consider use of unmanned hose holder or monitor nozzles. Do not use direct water stream. May spread fire. Eliminate ignition sources. Move container from fire area if this is possible without hazard. Burning liquids may be moved by flushing with water to protect personnel and used as a blanket for fire extinguishment. Contain fire water run-off if possible. Fire water run-off, if not contained may cause environmental damage. Review the "Accidental Release Measures" and the "Ecological Information" sections of this MSDS.
Protective Ec	quipment For Fire Fighters	:	Wear positive-pressure self-contained breathing apparatus (SCBA) and protective

	-				
	Revision Date: Version 2.0	05/12	Print Date: MSDS Identification:	08/30/12 6100FS - Part A	Unsaturated Polyester Resin
					re fighting helmet, coat, pants, boots, and gloves). vailable or not used, fight fire from a protected location
6. ACCIDENT	AL RELEASE N	/IEASURES	S (See Section	15 for Regulatory Inform	mation)
	Protect People			Keep personnel out of low area Vapor explosion hazard, keep of vicinity of spill or released vapo public of downwind explosion h handling equipment. No smoki additional information, refer to s	ry and unprotected personnel from entering the area as. Keep upwind of spill. Ventilate area of leak or spill. out of sewers. Eliminate all sources of ignition in or to avoid fire or explosion. For large spill, warn hazard. Check area with combustible gas and ing in area. Use appropriate safety equipment. For section 8, Exposure Controls / Personal Protection. r additional precautionary measures. See Section 10
	Protect The Enviror	nment			sewers, waterways and / or ground water. See tion. Spills or discharge to natural waterways is likely
	Cleanup			Remove residual with hot soap unless the recommended expos specific solvent are followed. C	ipment. If available use foam to smother and suppress. y water. Solvents are not recommended for cleanup sure guidelines and safe handling practices for the Consult appropriate solvent MSDS for handling elines. See Section 13, Disposal Considerations for
7. HANDLING	G AND STORAG	Ε			
	Handling		:	Wash thoroughly after handling with adequate ventilation. Vapo distance and accumulate in low Containers, even those that hav grind, weld, or perform similar of open flames or sources of igniti pressure for transferring produc equipment before transfer or us equipment may be necessary do organic materials on hot fibrous	and flame. Avoid contact with eyes, skin and clothing. g. Do not swallow. Avoid breathing vapor. Use only ors are heavier than air and may travel a long w lying areas. Ignition and / or flash back may occur. ve been emptied, can contain vapors. Do not cut, drill operations on or near empty containers. No smoking, ion in handling or storage area. Never use air ct. Electrically bond and ground all containers and se of material. Use of non-sparking or explosion proof depending upon the type of operation. Spills of these s insulations may lead to lowering of the auto ignition g in spontaneous combustion. See Section 8, Exposure
	Storage			static build up, heat, spark or fla	degrees F). Minimize sources of ignition, such as ame. Keep containers closed. Maintain inhibitor and s may polymerize to cause plugs in vents. See Section n.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Revision Date: Version 2.0	05/12 MSDS	Print Date: Identification:	08/30/12 6100FS - Part A	Unsaturated Polyester Resin
Engineering Measure	S		•	exhaust ventilation to control airborne levels below only with adequate ventilation.
Personal Protective E Eye /	Equipment Face Protection	:	Use chemical goggles. If exp	osure causes eye discomfort, use full face respirator.
Skin	Protection		resistant to this material. Who use chemically protective clot	dy-covering clothing. Use gloves chemically en prolonged or frequently repeated contact could occur, hing resistant to this material. Selection of specific items oots, apron, or full-body suit will depend on operation.
Resp	iratory Protection		respiratory protection is requi supplied-air respirator depend emergency and other condition use an approved positive-pre- pressure airline with auxiliary	maintained below the exposure guideline. When red, use an approved air-purifying or positive-pressure ding on the potential airborne concentration. For ons where the exposure guideline may be exceeded, ssure self-contained breathing apparatus or positive- self-contained air supply. In confined or poorly oved self-contained breathing apparatus or positive self-contained air supply.
Ехро	sure Guideline(s) Styrene		exposure limit in accord with a and accepted by OSHA in Ma STEL. ACGIH classifies as A	Iding PF&L, supports a 50 ppm TWA, 100 ppm STEL, a voluntary compliance program proposed by industry arch 1996. The ACGIH TLV is 20 ppm TWA, 40 ppm 4. (OSHA continues to list the PEL in the z-2 Table ceiling, with a maximum acceptable concentration of 3 hours).
9. PHYSICAL AND CHEMICAL	PROPERTIES			

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance	:	Yellow Liquid
Odor	:	Pungent Styrene
Vapor Pressure	:	4.5 mmHg @ 20C (based on Styrene)
Vapor Density	:	3.6 (based on Styrene)
Boiling Point	:	294 degrees F (146 degrees C) (based on Styrene)
Solubility in Water	:	Insoluble
Specific Gravity	:	1.020-1.060

10. STABILITY AND REACTIVITY

Stability	:	Stable under recommended storage conditions. See Storage, Section 7.
Conditions to Avoid	:	Avoid temperatures above 122 degrees F (50 degrees C). Exposure to elevated temperatures can cause product to decompose. Avoid static discharge. Do not

Revision Date: Version 2.0	05/12	Prir MSDS Identif	nt Date: ication:	08/30/12 6100FS - Part A	Unsaturated Polyester Resin
				blanket or purge with an inert ga direct sunlight or ultraviolet sour	as to avoid depleting the oxygen concentration. Avoid rces.
Incompatibility With	Other Mater	ials		0	terials, acids, caustic potash, caustic soda, metal act with peroxides. Avoid contact with absorbent sorbents.
Hazardous Decompo	osition Prod	ucts			d upon temperature, air supply and the presence of n products can include and are not limited to: carbon nolics.
Hazardous Polymeri	zation			inhibitor and dissolved oxygen I nitrogen. Polymerization can be	rres can cause hazardous polymerization. Maintain level. Do not purge containers of this material with e catalyzed by: free radical initiators, sunlight, nomer vapors can polymerize and plug relief devices.

11. TOXICOLOGICAL INFORMATION

(See Section 3 for Potential Health Effects. For detailed toxicological data, write or call the address or non-emergency number shown in section 1).

Skin	:	The LD 50 for skin absorption in rabbits is expected to be >2000 mg / kg.
Ingestion	:	The oral LD 50 for rats is expected to be >4000 mg / kg.
Mutagenicity (Effects On Genetic Material)	:	For Styrene: In vitro genetic toxicity studies were inconclusive. Animal genetic toxicity studies were inconclusive.

12. ECOLOGICAL INFORMATION (for detailed Ecological data, write or call the address or non-emergency number shown on Section 1).

Environmental Fate		:	:		
	Movement & Partitioning	:	Bases largely or completely on information for styrene. Bioconcentration potential is low (BCF less than 100 or Log Pow less than 3). Potential for mobility in soil is low Koc between 500 and 2000).		
	Degradation & Persistence	:	Based largely or completely on information for styrene. Material is readily biodegradable. Passes OECD test(s) for ready biodegradability. Material is ultimately biodegradable. Reaches more than 70% mineralization in OECD test(s) for inherent biodegradability.		
	Ecotoxicity	:	Bases largely or completely on information for styrene. Material is highly toxic to aquatic organisms on an acute basis (LC50/EC50 between 0.1 and 1mg/L in the most sensitive species tested).

15. REGULATORY INFORMATION (not meant to be all-inclusive -- selected regulations represented)

Notice: The information herein is presented in good faith and believed to be accurate as of the effective date shown above. However, no warranty, express or implied is given. Regulatory requirements are subject to change and may differ from one location to another; it is the buyer's responsibility to ensure that its activities comply with federal, state or provincial, and local laws. The following specific information is made for the purpose of complying with numerous federal, state or provincial, and local laws and regulations. See other sections or health and safety information.

U.S. Regulations

SARA 313 INFORMATION

This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

Chemical Name Styrene

:

CAS Number 000100-42-5

Concentration 30% - 60%

SARA HAZARD CATEGORY :

This product has been reviewed according to the EPA "Hazard Categories" promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

An immediate health hazard A delayed health hazard

Revision Date: Version 2.0	05/12	Print Date: MSDS Identification:	08/30/12 6100FS - Part A	Unsaturated Polyester Resin				
		A fire hazard						
TOXIC SUBSTAI	NCES CONTRO	L ACT (TSCA):						
ŀ	All ingredients ar	e on the TSCA invento	ry or are not required to be	e listed on the TSCA inventory.				
STATE RIGHT-T	O-KNOW	:						
	The following product components are cited on certain state lists as mentioned. Non-listed components may be shown in the composition section of the MSDS.							
		Styrene 00 PA1=Pennsylvania Haz		List PA1 PA3 nt at greater than or equal to 1.0%). ostance (present at greater than or equal to 1.0%).				
OSHA HAZARD	OSHA HAZARD COMMUNICATION STANDARD:							
1	This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.							
INFORMATION S	INFORMATION SYSTEMS (WHMIS) CLASSIFICATION FOR THIS PRODUCT IS:							
Γ	B2 - flammable liquid with a flash point less than 37.8C D2A - possible, probable or known human carcinogen according to classifications by IARC or ACGIH. D2B - eye or skin irritant. Refer to elsewhere in the MSDS for specific warnings and safe handling information. Refer to the employer's workplace education program.
