MATERIAL SAFETY DATA SHEET

SECTION I

DATE OF PREPARATION June 2011

PRODUCT NAME: PRODUCT CLASS: PRODUCT TYPE: D.O.T. CATEGORY: ADDRESS:

ICO Lastic, Part A

Urethane Prepolymer Blocked Polyurethane Prepolymer Chemical, NOIBN, non-Regulated **International Coatings** Div. of Milamar Coatings, L.L.C. 311 N.W. 122nd St. Ste. 100 Oklahoma City, OK 73114 405-755-8448 CHEM TEL 800-255-3924

TELEPHONE: EMERGENCY:

SECTION II - HAZARDOUS INGREDIENTS

NFPA Rating: Health 1, Flammability 1, Reactivity 0

Listed below are the hazardous component(s) as defined in 49 CFR 172 and 29 CFR 1910 which are present in this product and all components which appear on the hazardous substance list of any state
Formula is considered trade secret

		considered trade	300101		
SECTION III - PHYSICAL DATA					
PHYSICAL STATE:	Viscous liquid	ODOR:	Slightly Phenolic		
SPECIFIC GRAVITY:	1.13 at 77ºF.	DENSITY:	9.4 lbs/gal		
pH:	NA	SOLUBILITY:	Negligible		
PERCENT VOLATILES:	0 at 70°F				
SECTION IV - FIRE AND EXPLOSION HAZARD DATA					
FLASH POINT:	400 ° F (Pensky Martens C	losed Cup)			
FLAMMABILITY LIMITS:	LFL:				
EXTINGUISHING DATA:	Foam, Dry Chemical, Carbo	on Dioxide (CO2)	; Water spray for large fires.		
NOTE: Full emergency equipment with self-contained breathing apparatus and full protective clothing (such as rubber					
EXTINGUISHING DATA:	Foam, Dry Chemical, Carbo				

gloves, boots, bands around legs, arms and waist) should be worn by fire fighters. No skin surface should be exposed. During a fire, toluene diisocyanate (TDI) vapors and other irritating, highly toxic gases may be generated by thermal decomposition or combustion. (See Section VIII). At temperatures greater than 350°F (177 C) TDI forms carbodimides with the release of CO₂ which can cause pressure build-up in closed containers. Explosive rupture is possible. Therefore, use cold water to cool fire-exposed containers.

SECTION V - HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE:

ACUTE INHALATION:	Inhalation of spray mists may cause respiratory irritation as a result of exposure to branched 4- nonyl-Phenol. Symptoms may include a burning sensation in the nose and throat and possibly chest pain and/or chest tightness.
ACUTE SKIN CONTACT:	Prolonged skin contact may result in skin irritation. Symptoms may be reddening, swelling, rash, scaling and blistering.
AACUTE EYE CONTACT:	Eye irritation; symptoms are pain, tearing, reddening and swelling.
CHRONIC:	None reported.
CARCINOGENICITY:	None Reported.
EMEDOENOV AND EIDET	

EMERGENCY AND FIRST AID PROCEDURES:

EYES: Flush with clean, lukewarm water (low pressure) for at least 15 minutes holding eyelids open all the time,

and obtain medical attention. Refer individual to an ophthalmologist for immediate follow-up.

SKIN: Remove contaminated clothing immediately. Wash affected areas thoroughly with soap and water for at least 15 minutes. Wash contaminated clothing thoroughly before reuse. Wash contaminated shoes before reuse. For severe exposures, get under safety shower after removing clothing, get medical attention, and consult physician.

INHALATION: Move to an area free from risk of further exposure. Administer oxygen or artificial respiration as needed. Obtain medical attention. Consult physician

.INGESTION: Do not induce vomiting. Give 250 ml of milk or water to drink. **DO NOT GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON** Consult physician.

NOTE TO PHYSICIAN: Eyes: Stain for evidence of corneal injury. If cornea is burned, instill antibiotic steroid preparation frequently. Workplace vapors have produced reversible corneal epithelial edema impairing vision. Skin: Treat as contact dermatitis. Respiratory: Treatment is essentially symptomatic.

SECTION VI - REACTIVITY DATA

STABILITY:

HAZARDOUS POLYMERIZATION:

This is a stable material. Will not occur.

INCOMPATIBILITY: Certain amines may cause unblocking at lower temperatures. INSTABILITY CONDITIONS Blocking agent and toluene diisocyanate are released a temperatures above248°F (120°C).

DECOMPOSITION PRODUCTS by fire: CO₂, CO, Phenol derivatives, low molecular weight organic fragments, TDI.

SECTION VII - SPILL OR LEAK PROCEDURE

SPILL OR LEAK PROCEDURES: Equip clean-up crew with appropriate protective equipment (See Employee Protection Recommendations). Dike or impound spilled material and control further spillage if feasible. Cover spill with sawdust, vermiculite, Fuller's earth or other absorbent material. Collect material in open containers.

WASTE DISPOSAL METHOD: Waste material must be disposed of in accordance with federal, state and local environmental control regulations. Empty containers must be handled with care due to product residue. DO NOT HEAT OR CUT EMPTY CONTAINER WITH ELECTRIC OR GAS TORCH. (See sections IV and VIII). Vapors and gases may be highly toxic.

SECTION VIII - SPECIAL PROTECTION INFORMATION

EYE PROTECTION REQUIREMENTS Chemical safety goggles or safety glasses with side shields

SKIN PROTECTION REQUIREMENTS Permeation resistant gloves (butyl rubber). Cover as much of the exposed skin area as possible with appropriate clothing. If skin creams are used, keep the area covered only by the cream to a minimum.

RESPIRATOR REQUIREMENTS:None required under normal conditions of use. Tests have shown that the recommended room temperature, amine-driver curing reaction does not release airborne toluene diisocyanate (TDI). However, if a fire or a process upset occurs resulting in heating above 248°F (120°C), workers must wear positive-pressure, air-supplied respirators since airborne TDI may be generated under these conditions. You must consult the MSDS for TDI (Mondur TD-80) which is available by contacting your Mobay sales representative.

VENTILATION REQUIREMENTS: Local

EXPOSURE GUIDELINES:none established

SECTION IX - SPECIAL PRECAUTIONS

STORAGE TEMPERATURE (MIN/MAX) SHELF LIFE: SPECIAL SENSITIVITY: 32°F (0°C)/122°F (50°C) 12 months at 77°F (25°C) Heat (See Reactivity Data)

HANDLING/STORAGE PRECAUTIONS: Store in tightly closed containers to prevent moisture contamination. Do not reseal if contamination is suspected. Avoid contact with skin and eyes. Do not breathe aerosols or vapors. Warning properties (irritation of the eyes, nose and throat or odor) are not adequate to prevent chronic overexposure from inhalation. Employee education and training in the safe use and handling of this compound are required under the OSHA Hazard Communication Standard.

SECTION X – REGULATORY INFORMATION

WHMSIS CLASSIFICATION: NONE REGULATED

THE INFORMATION HEREIN RELATES TO THE PRODUCT NAMED AND IS BASED UPON INFORMATION INTERNATIONAL COATINGS CONSIDERS TO BE ACCURATE. NO WARRANTY EXPRESSED OR IMPLIED IS INTENDED.

SECTION VI - REACTIVITY DATA

Incompatible materials (materials to avoid): Avoid contact with nitrocellulose or chlorinated hydrocarbons as violent decomposition reaction can occur.

HAZARDOUS PRODUCTS:CO, CO₂, and NOx

Product is stable under normal conditions.

SECTION VII - SPILL OR LEAK PROCEDURE

STEPS TO TAKE IF SPILLED

Using recommended protective equipment, add dry material to absorb spill (if large spill, first dike to contain). Pick up and containerize. This material is not regulated under RCRA or CERCLA.

WASTE DISPOSAL This product if disposed as shipped meets EPA criteria of a hazardous waste as specified in 40CFR 261 on the basis of its corrosivity and must be disposed of in a hazardous waste facility in accordance with applicable laws.

SECTION VIII - SPECIAL PROTECTION INFORMATION

VENTILATION REQUIREMENTS: Use local exhaust to control vapors/mist.

PERSONAL PROTECTIVE EQUIPMENT RECOMMENDED FOR NORMAL USE CONDITIONS:

EYE PROTECTION: Chemical goggles

SKIN PROTECTION: Rubber or plastic gloves

RESPIRATORY PROTECTION: Respirator with organic vapor cartridge (N/A with local exhaust).

SECTION IX - SPECIAL PRECAUTIONS

Do not handle or use product until safety precautions recommended in this data sheet have been read and fully understood.

SECTION X - TRANSPORTATION

 DOT PROPER SHIPPING NAME:
