3.1 Mixtures

Chemical Identity	CAS No.	Concentration
Quartz	14808-60-7	> 90%

4.0 FIRST-AID MEASURES

4.1 Description of necessary first-aid measures:

Eye Contact: Wash with water for at least fifteen (15) minutes. If irritation or redness persists, see a physician.

Skin Contact: Wash with soap and water. If irritation persists, see a physician.

Inhalation: Shortness of breath, coughing, reduced pulmonary function. PROLONGED INHALATION OF RESPIRABLE SILICA WILL RESULT IN PERMANENT LUNG DAMAGE, SILICOSIS. No specific first aid is necessary since the adverse health effects associated with exposure to crystalline silica (quartz) result from chronic exposures. If there is a gross inhalation of crystalline silica (quartz), remove the person immediately to fresh air, give artificial respiration as needed, seek medical attention as needed.

Ingestion: May cause gastrointestinal discomfort. Give one or two glasses of water. If discomfort persists, see a physician

4.2 Most Important symptoms/effects, acute and delayed:

Signs and Symptoms: Generally, there are no signs or symptoms of exposure to crystalline silica (quartz).

Aggravated Medical Conditions: The condition of individuals with lung disease (e.g., bronchitis, emphysema, chronic obstructive pulmonary disease) can be aggravated by exposure.

Other Health Effects: Silicosis: Respirable crystalline silica (quartz) can cause silicosis, a fibrosis (scarring) of the lungs. Silicosis may be progressive; it may lead to disability and death.

4.3 Indication of immediate medical attention and special treatment needed, if necessary: The adverse health effects – silicosis, cancer, autoimmune diseases, tuberculosis, and nephrotoxicity – are chronic effects.

5.0 FIRE-FIGHTING MEASURES

5.1 Suitable extinguishing media: Crystalline silica (quartz) is not flammable, combustible, or explosive.

5.2 Specific hazards arising from the chemical: N/A

5.3 Special protective actions for fire-fighters: N/A

6.0 ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures: Ventilate the area. Avoid breathing dust. Use self-contained breathing apparatus or supplied air for large spills or confined areas.

6.2 Methods and materials for containment and clean up: Clean up using approved, dustless methods (water or vacuum) to minimize generation of respirable silica particles. Dispose of in accordance with federal, state, and local regulations.

7.0 HANDLING AND STORAGE

7.1 Precautions for safe handling: Use NIOSH approved equipment. Positive pressure supplied air-type recommended. Appropriate respiratory protection for respirable particulates is based on consideration of airborne workplace concentrations and duration of exposure arising from the intended end use.

7.2 Conditions for safe storage, including any incompatibilities: Avoid generating dust. There are no special storage requirements.
