Sports Series

This is a flooring game changer.

SUPERCOAT™ Sports Series is the answer to hundreds of flooring needs. From garages and basements to man-caves, locker-rooms and Fieldhouse's SUPERCOAT Sports Series is ideal for protecting the floor while creating a clean, attractive, finishing touch.

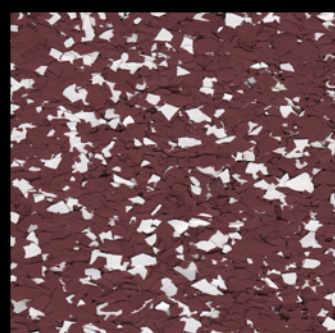

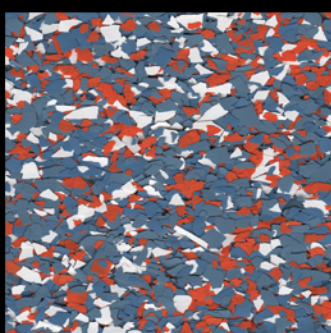

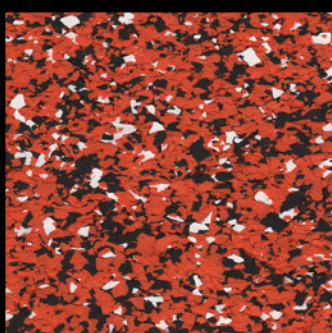

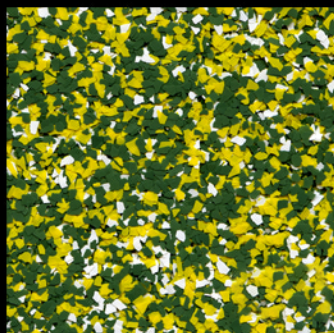

Available in 5 Sports blends, SUPERCOAT Sports Series is resistant to damage caused by most chemicals, such as: gasoline, brake fluid, standing water and even battery acid. It is far superior to traditional floor paint and is stronger than many heavy-duty industrial coatings.

Known as the "Breathable Epoxy", SUPERCOAT Sports Series is the only product to feature WET Chemistry, which ensures that the coating won't chip, peel or blister due to water vapor migration through the concrete.

Each kit of SUPERCOAT Sports Series covers approximately 250 sq. ft. (about a single car garage) and comes complete with decorative flakes, a cleaner/de-greaser, a non slip aggregate and detailed instructions. In addition, a variety of optional clear glaze coats are available to encapsulate the flakes and give your floor an even higher gloss finish.

SUPERCOAT Sports Series is as easy to apply as paint after minimal surface preparation. No acid etching or mechanical prep is necessary in most cases. Floor Preparation, of course, is the most important step because SUPERCOAT Sports Series' bond is dependent upon the substrate's condition.
